FY 2014/2015 Funding Opportunity Announcement Questions and Answers

November 5, 2014

1. Based on the published answer to questions, the grant period is Feb 01, 2015 to June 30, 2015, which is 5-month period for \$500,000-\$1,000,000. I'm trying to understand the funding mechanism. Is it for extension of the existing projects? I thought it is a two-year grant.
This is a new funding opportunity. This is not an extension for existing projects.
2. Do we have to include quotes for equipment proposed to purchase in the application?
Yes. Cost for equipment should be indicated on the budget template and budget narrative form.
3. Do we need to include a personal statement in NIH style biosketch?
A personal statement is not required.
4. Can we include our key publications as attachment?
Include peer-reviewed publications in the biographical sketch format that is provided in the online application system.
5. If the subcontract has \$100,000 in direct costs, are they able to request the 15% IDC on their TDC? Can the prime institution also receive 15% TDC on the subcontracts \$115,000 (\$100,000 + 15%)? If the prime cannot request 15% IDC in addition to the subcontracts request for 15% IDC, is the prime institution expected to negotiate a lower IDC rate with the subcontract in order to retain a portion of the 15% IDC associated with the subcontract directs? Is the subcontractor expected to accept a lower rate than 15%?
Per page 15 of the FOA: Additional indirect costs by subcontractors are not allowed in excess of the allowable amount based on the total cost of the grant.
